# QUICK FIX

## SYNTHETIC URINE

### Quick Fix Synthetic Urine

is the clean, pre-mixed laboratory urine that everyone is talking about!

Instead of generating the urine in a human body, Spectrum Labs has perfected a means of creating urine in a laboratory environment. This laboratory process results in a cleaner, fresher urine that is toxin free and balanced for pH, specific gravity, creatinine, and several other urine characteristics.

## SPIT CLEAN

Spit Clean Mouthwash is a safe and effective way to temporarily detox your saliva.

Spit Clean is effective in as little as 2-3 minutes and lasts up to 30 minutes! No preparation time is required and it can be used at a moment's notice! This makes it perfect for customers that do not know the exact time that they need to detox their saliva.

## GET CLEAN

Get Clean Shampoo is a leave-in detox, designed to mask unwanted toxins in the hair.

Instead of stripping chemicals from hair, Get Clean Shampoo changes the chemical makeup of the toxins.

Get Clean Shampoo is one of the best selling and most trusted detox shampoos on the market today!

We recommend using both  
Get Clean Shampoo and  
Ultra Cleanse together

500%  
manufacturer  
guarantee

## ULTRA CLEANSE

Ultra Cleanse Hair Cleansing Shampoo & Conditioner has been specially formulated to remove all toxins from the hair shaft.

You will not find a better hair toxin stripping shampoo in the detox industry today!

## DRUG TESTING KITS

**1 PANEL HOME TEST KIT**  
 www.Detox4Less.com • 1.877.420.3386  
**Test Procedure and Interpretation of Results**  
**Note:** Do not open the foil pouch until you are ready to perform the test. If a sample or test kit was refrigerated, bring unopened pouch and test sample to room temperature before performing test.

**Test procedure**  
 1. Open foil pouch by tearing the "notch". Remove the testing device and the sample dropper. Place the testing device on a flat horizontal surface.  
 2. Holding the dropper vertically, carefully dispense exactly four (4) drops of urine into the sample well (marked "S") of the testing device.  
 3. Read the test results at (5) minutes.

**Interpretation of the Test Results**  
 Observe the two color lines (bands): the control ("C") region of the test membrane, and the test line in the ("T") region of the membrane.

**Positive**  
 The control line appears in the test window, but the test line is not visible. Concentration in the test sample is 50ng/ml or more.

**Negative**  
 Two pink color lines (bands) are visible in the control ("C") and the test ("T") areas of the test window. Test level in the urine sample is below the sensitivity of the test.

**Invalid**  
 The test is invalid if the control line is not visible at five (5) minutes. The test failed, or the test procedure was not followed properly. Verify the test procedure and repeat the test with a new testing device.

**Note:** Do not interpret results after more than five (5) minutes. It is most accurate should the testing device after registering the test results at five (5) minutes. Not for use with alcohol products.

# 1 PANEL KIT

## Checks for the byproduct of THC

With the THC home drug test kit, you'll be able to test your THC (marijuana) levels in your own home. If you can pass this home drug test, you can be 98% sure of also passing the laboratory drug test screen or the on-site drug test screens given by employers, parents and coaches. Our tests are equally effective as those you'll find in your corner drug store, just without the overpriced packaging. Don't throw your money away on a box when you can save big by buying our home marijuana drug test kits.

# 5 PANEL KIT

## Checks for five different toxins in urine

These drug test kits test for the top five drugs tested for by employers, parole officers, coaches and parents: THC, Opiates, Cocaine, Amphetamines and Meth. Although private employers and government agencies may choose to test for more than just the big five, you can be almost 100% certain that at least these five will be tested for in any workplace program.

**5 PANEL HOME TEST KIT**  
 www.Detox4Less.com • 1.877.420.3386

**Test Procedure**  
 1. Make sure test kit is room temperature.  
 2. Do not break the seal of the pouch until ready to begin testing.  
 3. Remove the protective cap and place the resulting strip into the urine sample for 10 seconds. Do not allow the urine level to touch the plastic device.  
 4. Read the results at five (5) minutes.

**Note:** Do not interpret results after more than five (5) minutes. It is most accurate should the testing device after registering the test results at five (5) minutes. Not for use with alcohol products.

**Interpretation of the Results**

**NEGATIVE** **POSITIVE** **INVALID**

**NEGATIVE:** A new pink band is visible in each control zone and in the appropriate test zone, indicating that the concentration of that specific test zone is below the detection level of the test.

**POSITIVE:** A new pink band is visible in each control zone. No color band appearing in the appropriate test zone indicates a positive result for that specific test zone.

**INVALID:** If a color band is not visible in each of the control zones, the test is invalid. Another test should be run to re-evaluate the specimen.

**Note:** This is a measuring product to be used in conjunction with our test for use with alcohol products.
